History

PAPER 1: Thematic study and historic environment
OPTION 11: Medicine in Britain, c1250–present and
The British sector of the Western Front, 1914–18:
injuries, treatment and the trenches

You must have:

Sources Booklet (enclosed)

Total Marks

--

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- There are two sections in this question paper. Answer Questions 1 and 2 from Section A. From Section B, answer Questions 3 and 4 and then **EITHER** Question 5 **OR** Question 6.
- Answer the questions in the spaces provided
– *there may be more space than you need.*

Information

- The total mark for this paper is 48.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.
- Good luck with your examination.

Answer EITHER Question 5 OR Question 6.

EITHER

- 5** 'The role of the Church was the main reason why there was little change in care and treatment in the years c1250–c1500.'

How far do you agree? Explain your answer.

(16)

You may use the following in your answer:

- medical training
- herbal remedies

You **must** also use information of your own.

(Total for Question 5 = 16 marks)

OR

- 6** 'The printing press led to significant progress in medical knowledge and treatment in the years c1500–c1700.'

How far do you agree? Explain your answer.

(16)

You may use the following in your answer:

- Vesalius' book, *The Fabric of the Human Body*
- herbal remedies

You **must** also use information of your own.

Sources for use with Section A.

Source A: From an account written after the First World War by Charlie Shepherd. Charlie Shepherd was a soldier who fought in the war. Here he is describing his experiences in a hospital on the Western Front in 1915.

I was in the hospital. They wanted a volunteer to give blood for a transfusion. I volunteered and they checked that I was the same blood group as the soldier who needed blood.

He'd lost a leg. Gangrene had set in and they'd had to amputate it. Oh, he looked like death! As white as a sheet!

I've still got the scar where they opened me up to get the tube into my vein. The blood flowed up the tube to a bottle and from there it went into the soldier's arm. I was watching him. Believe me, you could see the colour coming back into his face.

Source B: From an article in *The Lancet*, June 1918. The author was a doctor who worked at a Casualty Clearing Station on the Western Front. *The Lancet* was a medical journal, which was a way of doctors sharing new ideas.

Every day, Casualty Clearing Stations are dealing with severely wounded patients who have lost a lot of blood. Their chance of recovery depends on receiving a blood transfusion.

There are three methods of transfusion:

1. A syringe is used to take blood from the donor; the blood is immediately injected into the patient's vein.
2. Blood can be stored briefly in glass containers.
3. The citrate method can be used to prevent blood clotting and store it for longer.

I have used the syringe method. This works well as the blood is outside the body for only 15–20 seconds and the whole process is controlled by the surgeon.
